# How to Make Bird Poop

**S**pill a good-looking plop of Elmer's on a piece of waxed paper. The shape matters so look at the photo. Add a few bits of dirt, unmixed. Again, this is slow-dry. Figure a few days in a warm room.

**In a coffee cup mix Elmer's white glue with a few drops of brown acrylic paint. Then dump onto a sheet of wax paper and let dry (which can take days if your room is cold). Add a coffee stirrer or spoon if you're a stickler for realism.**
